

YEDL Transformer Refurbishment Project

Winder Electrical's Projects Division has just completed its latest refurbishment project for YEDL at Seacroft, Leeds.

The scope of the project included the design, manufacture, supply and installation of replacement cooler banks, rectification of leaks on the main transformer tanks, a full repaint, and filtering of the oil on completion to 2 x YET transformers manufactured in 1967. Furthermore, both transformers were completed in 10 working days, on site, to an agreed total budget of £80k.
